Electric press brakes

Precise, electric, green

Incredible accuracy
Servo electric
Ball screw driven
24 tons – 166 tons
34" – 160"

Resistance spot welders

Coollest welds you can't even see

Welds all materials | stud and nut welding
Exclusive easy setting timer
High speed technology
Single and dual arm models

Multiflex Cornerformers

Perfect corners every time

All materials
NO welding
NO grinding
NO finishing
NO setups

Hydraulic folding machines

The perfect folder for every demand

Capacities 19.7" – 315"
Sheet thickness 19 GA – 1"
Swiveling upper beam
Patented hydraulic camber

Press Brakes

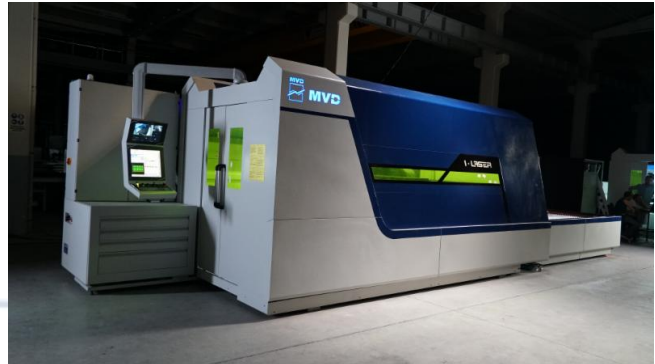

iBend brakes shape the future

- Reliable, durable, and precise
- Top-of-the line components
- Choice of controls and safety systems
- 3-12 axes
- 40 – 1,000 tons
- 4' – 26.5' bending lengths

Fiber Lasers

iLaser: speed, technology, performance

- 2kW, 3kW, and 4 kW models
- 6.5 – 20' tables
- IPG resonators
- Precitec cutting heads
- Shuttle table/flying optic design

Flow Forming Metal Spinning

World leader in chipless metal forming

- Cutting edge technology for:
- Flow forming
- Metal spinning
- Edge processing
- Hub spinning
- Profiling

RODSTEIN

Busbar Punching and Bending

Automated busbar processing

- All electric, servo driven
- Automatic tool changing
- Robot ready
- Fast, energy efficient
