One Machine. One Operator. One Setup. A Payapress 3-in-1 Pays You Back

Optimize Busbar Production – Reduce Labor Expenses – Lower Equipment Costs

HBC A160-ES 3-in-1 Busbar Processing System

Visit us in Las Vegas for live demos
Booth C6448, Central Hall

Replace Three Machines with One Smart Busbar Processing System

Production Costs	Traditional Busbar Processing	Payapress 3-in-1
Labor	Multiple operators and setups	One operator, one setup
Material Handling	Parts transferred between machines	No intermediate transfers
Floor Space	Three footprints	One compact footprint
Throughput	Multiple production and scheduling queues	Continuous processing
Quality	Variations between systems	Single CNC-controlled process
Scrap & Rework	More opportunities for error	Reduced scrap and rework
Maintenance	Three machines to maintain	One machine to maintain
Utilities	Three machines consume power	One machine lowers utility costs
Depreciation	Investment spread across three assets	One machine investment
Safety	More handling and operators risks more injuries	Less handling, fewer operators

Bottom Line: The Payapress 3-in-1 Advantage

- ⇒ One machine replaces three
- ⇒ One operator instead of multiple operators
- ⇒ Lower labor, maintenance, and utility costs
- ⇒ Faster throughput and shorter lead times
- ⇒ Less risk of injury
- ⇒ Low price point accelerates your ROI
- ⇒ Fast, low-cost installation and service from our expert technician
- ⇒ One setup instead of multiple setups
- ⇒ Reduced floor space requirements
- ⇒ Improved accuracy and repeatability
- ⇒ Reduced scrap, rework, and work-in-process inventory
